Prosthetic Complications in Implant Dentistry: Problem Solving and Avoiding Pitfalls

Clinical applications of implant dentistry have come a long way since introduction in the early 80s. As more implants are placed and restored, our standard for excellence in these restorations from an aesthetic, functional and long-term success outcome has increased tremendously. This high standard is limited by numerous complications both from a surgical and prosthetic standpoint. This presentation will discuss common and uncommon complications associated with implant prosthetic restorations.

At the completion of this course, participants will be able to learn:

• How to anticipate and avoid complications associated with removable and fixed implant prosthetic restorations.
• How to deal with the challenges of implant prosthetics will be discussed using clinical examples.

Dr. Neena D’Souza completed her graduate training in the specialty of Prosthodontics and a Master’s degree at the Faculty of Dentistry at the University of Toronto.

Dr. D’Souza has been working in Mississauga as a prosthodontist since 2001. A large portion of her practice is the treatment of patients with severely worn dentitions, aesthetically challenging dentitions and malocclusions that require complex rehabilitation. In addition, she sees patients with TMJ disorders, who are diagnosed and treated conservatively.

Dr. D’Souza has presented lectures at the Halton Peel Dental Association, the Canadian Academy of Restorative and Prosthetic Dentistry, the Periodontal Associates Study Club, the Association of Prosthodontists of Ontario and for Nobel Biocare.

She is currently President Elect of the Association of Prosthodontists of Ontario, a member of the Association of Prosthodontists of Canada, the Canadian Dental Association and a Fellow of the Royal College of Dentists of Canada. Dr. D’Souza is involved in clinical teaching at the University of Toronto. She is a consultant Prosthodontist at the Trillium Hospital in Mississauga and maintains a private practice in Mississauga, limited to Prosthodontics and Implant dentistry.

Mr. Fadi Touma is a 1994 graduate of Ferris State University (Dental Technology program). He worked in a prosthodontic specialty office from 1994 to 2001. In 2001, he started his own specialty laboratory focusing on full mouth reconstruction, implants and cosmetic dentistry. He has extensive implant knowledge and experience with most implant systems.

Mr. Touma holds an American certification in addition to his Canadian registration. He is currently the DENTSPLY Implants District Sales Manager and Technical Advisor for the Eastern and Atlantic regions of Canada.
